What we supply

- **Network installation.** Switches, routers, firewalls, Wi-Fi and fibre links installed, configured, tested and documented.
- **Structured cabling.** Copper and fibre cabling for offices, schools, clinics and server rooms, labelled and tested.
- **Data centre smart hands and remote hands.** Patching, hardware swaps, audits, rack and stack and checks in colocation and server rooms, with photo reports.
- **Server and rack installs.** Rack builds, cable management, server installs, decommissions and server room builds.
- **Cloud and Microsoft 365.** Microsoft 365 and cloud migrations, identity, backup and security set-up.
- **IT support.** Helpdesk, monitoring, maintenance and on-site fixes under a service agreement.
- **CCTV.** CCTV and access control installation for offices, campuses and server rooms.

How we work

- **Scoped in writing.** Every job is scoped, quoted and agreed in writing before an engineer is dispatched. We do not publish standing prices.
- **Method of procedure.** We work to your procedure and site access rules, including escorted access, induction and change windows.
- **Documented close-out.** Each job closes with photos, labels, test results and handover notes you can attach to your ticket.
- **Remote first, on site when needed.** Helpdesk and remote hands run from Johannesburg, with engineers dispatched to site by road or air.

Where we supply

Across South Africa, including Johannesburg, Pretoria, Midrand, Cape Town, Durban, Gqeberha and Bloemfontein, and in Namibia, Lesotho, Mozambique, Eswatini and Cameroon. We also support tenants in colocation facilities and provide engineers across Africa and around the world through our field network. A London office serves global markets.

Typical buyers

National, provincial and local government departments, state-owned entities, schools and clinics, financial institutions, telecoms and data centre tenants, and private-sector organisations of all sizes.

How to request a quotation or submit a bid

1. Email the RFQ or tender document to supply@iitech.co.za with the reference number, scope, site and closing date.
2. We review the scope, attend any briefing or site visit and confirm questions in writing.
3. We submit a priced quotation or bid before the closing date, with our supplier documents.
4. Work is delivered to specification and closed out with test results, photos and handover notes.

Verify our registration

Our supplier details can be verified on the National Treasury Central Supplier Database using supplier number MAAA1069087. Supporting documents can be supplied with each bid submission.
